

**There is always  
a good argument  
for Kopp.**

***Kopp***

# We operate at full voltage.

## Welcome to Kopp.

Inspiring with quality. This is what everything we do at Kopp is about. And this is why we have been one of the most successful manufacturers of electrotechnology and installation products in the German-speaking area for over 90 years. With over 7000 products, we offer you a perfectly coordinated assortment, which we are continuously developing and improving. From classic connectors to flexible power distributors to innovative wireless systems and smart home solutions - we deliver what you need. And all at an excellent price-performance ratio. With a first-class level of service and the support of a global network.

# Always keeping pace with the times.

## **Our experience for your future.**

Every success story needs a starting point. As did our own. In 1927, Heinrich Kopp founded a small, specialist factory in Odenwald and produced switches for export. The market requirements both in Germany and abroad made rapid expansion of the range of products supplied necessary. Today, more than 500 employees are dedicated to finding better solutions every day. For professionals and DIY enthusiasts, industry and the electrical wholesale trade. Our story is one of assertiveness on the global market and tells of our ability to play an active role in shaping change. This is why we still enjoy the full confidence of our customers today.

## 90 years of electrifying history(s):

**1927** Foundation of the Heinrich Kopp company in Reinheim (Odenwald) as a specialist factory for switches on the German and international market.

**1934** Relocation to Sonneberg (Thuringia), where Kopp began its innovative use of plastics.

**1956** Construction of today's company headquarters in Kahl am Main as the main location.

**1987** Establishment of a production plant in Tunisia, among others things, for manual production and complex solutions.

**2000** Construction of the ultra-modern logistics centre in Kahl am Main..

**2002 – 2016** Continuous expansion of our international orientation, culminating in Kopp's integration into the alfanar Group's network.

**2017** Kopp celebrates its 90th anniversary!

# Your request, our benchmark.

## Clever solutions that meet professional standards.

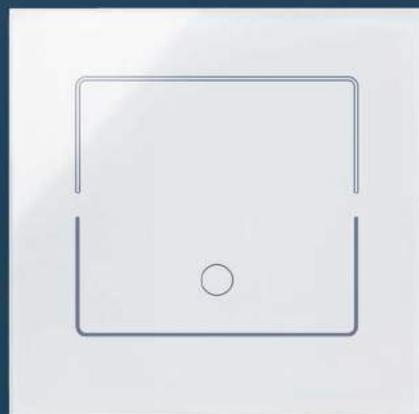

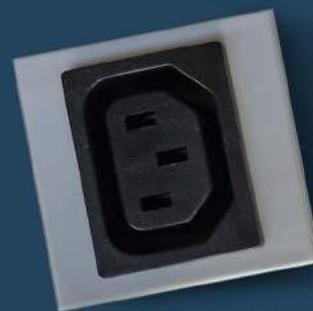

Our range focuses on switch programmes in a broad variety of designs and materials. The product range is complemented by a wide range of electrical accessories and installation materials. Thus, we cover the entire spectrum for electrical installation.

For **industry**, we produce electronic components and solutions for demanding applications, such as the power strips we developed better energy management. We know we can rely on continuous dialogue - from the first meeting to the desired product and its application.

For the **electrical wholesale trade**, we are a partner on equal terms. With Green Electric, we deliver high-tech for distribution boxes, with the PRCD-S a mobile personal protection device for greater safety on construction sites and with the HK i8 a good argument for customer advice.

For **DIY enthusiasts**, we offer almost our entire range of electrical materials via leading building supply and specialist stores. The focus is on switch programmes, dimmers, wireless switch systems, socket strips, motion detectors, connectors, couplings and adapters.

# Switching to Kopp pays off.

## Quality from Germany.

Our products meet the highest technological standards. They combine the know-how of experienced engineers with the advantages of a modern, computer-controlled production. This allows us to produce efficiently and cost-effectively at our headquarters in Kahl am Main. We are very happy to pass this price advantage on to you. Regarding compliance with strict standards and the continuous improvement of our processes, we leave nothing to chance: Our quality management system has been certified according to ISO 9001 for over 25 years.

## Guaranteed with our guarantee.

We believe in the quality of our products. This is why we give you a 20 year quality guarantee with our switch programmes.

# Ideas, that convince.

## **Always one step ahead.**

How do we make our products even better for you? By trying out new things, daring to attempt the impossible and working hard to achieve it. As far back as 1934, we were already using plastic parts in our switch programmes, demonstrating our extraordinary instinct for the future.

This pioneering spirit is what still drives us today. Whether the HK i8 sensor glass switch or our Freecontrol wireless home automation system, with our enthusiasm, we bring new ideas and innovative products to the market that will help you now and in the future.

## Outstanding technology

It is clear to see from the praise we receive in the press, especially the specialist media, from the awards we have received and above all from the top ratings by our customers that Kopp really hits the nail on the head. And this motivates us to begin each day anew.

# Networked without limits.

## Your international network.

We produce for customers all over the world. We have always moved in a global market and, over time, have further expanded our export trade with international locations. Our dense sales network is also available to you, as is our professional service.

As part of the alfanar Group, we benefit from technical know-how, a long-term orientation and a strong industrial base. At the same time, we have retained the flexibility and speed of a medium-sized enterprise.

## Logistics are quick and efficient with us.

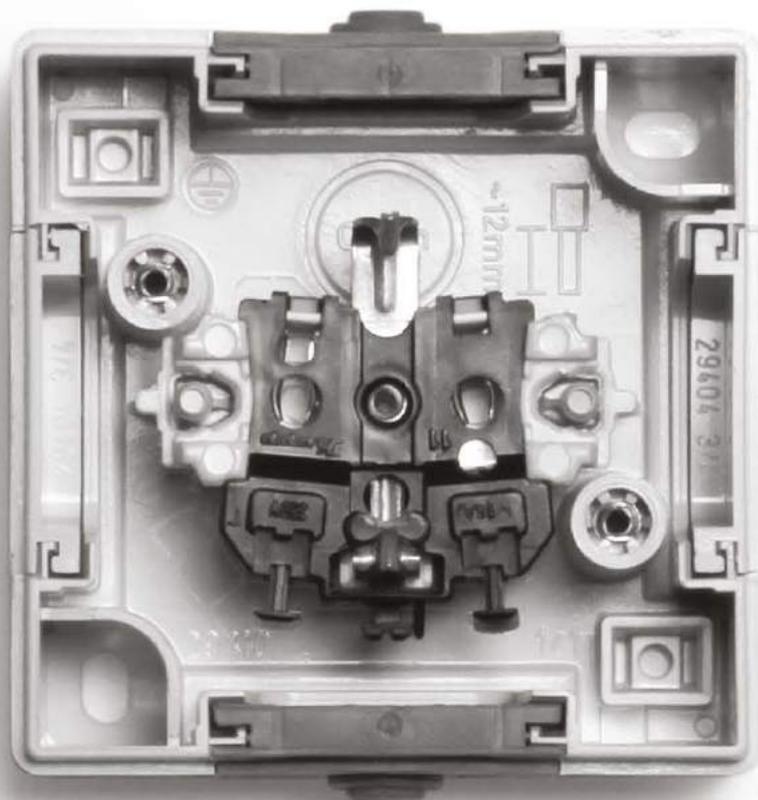

A modern warehouse and logistics centre in Kahl am Main ensures the availability of our products via all sales channels, allowing fast picking and speedy dispatch of your goods. This enables us to achieve the highest delivery quotas - making us your reliable partner for the timely supply of goods.

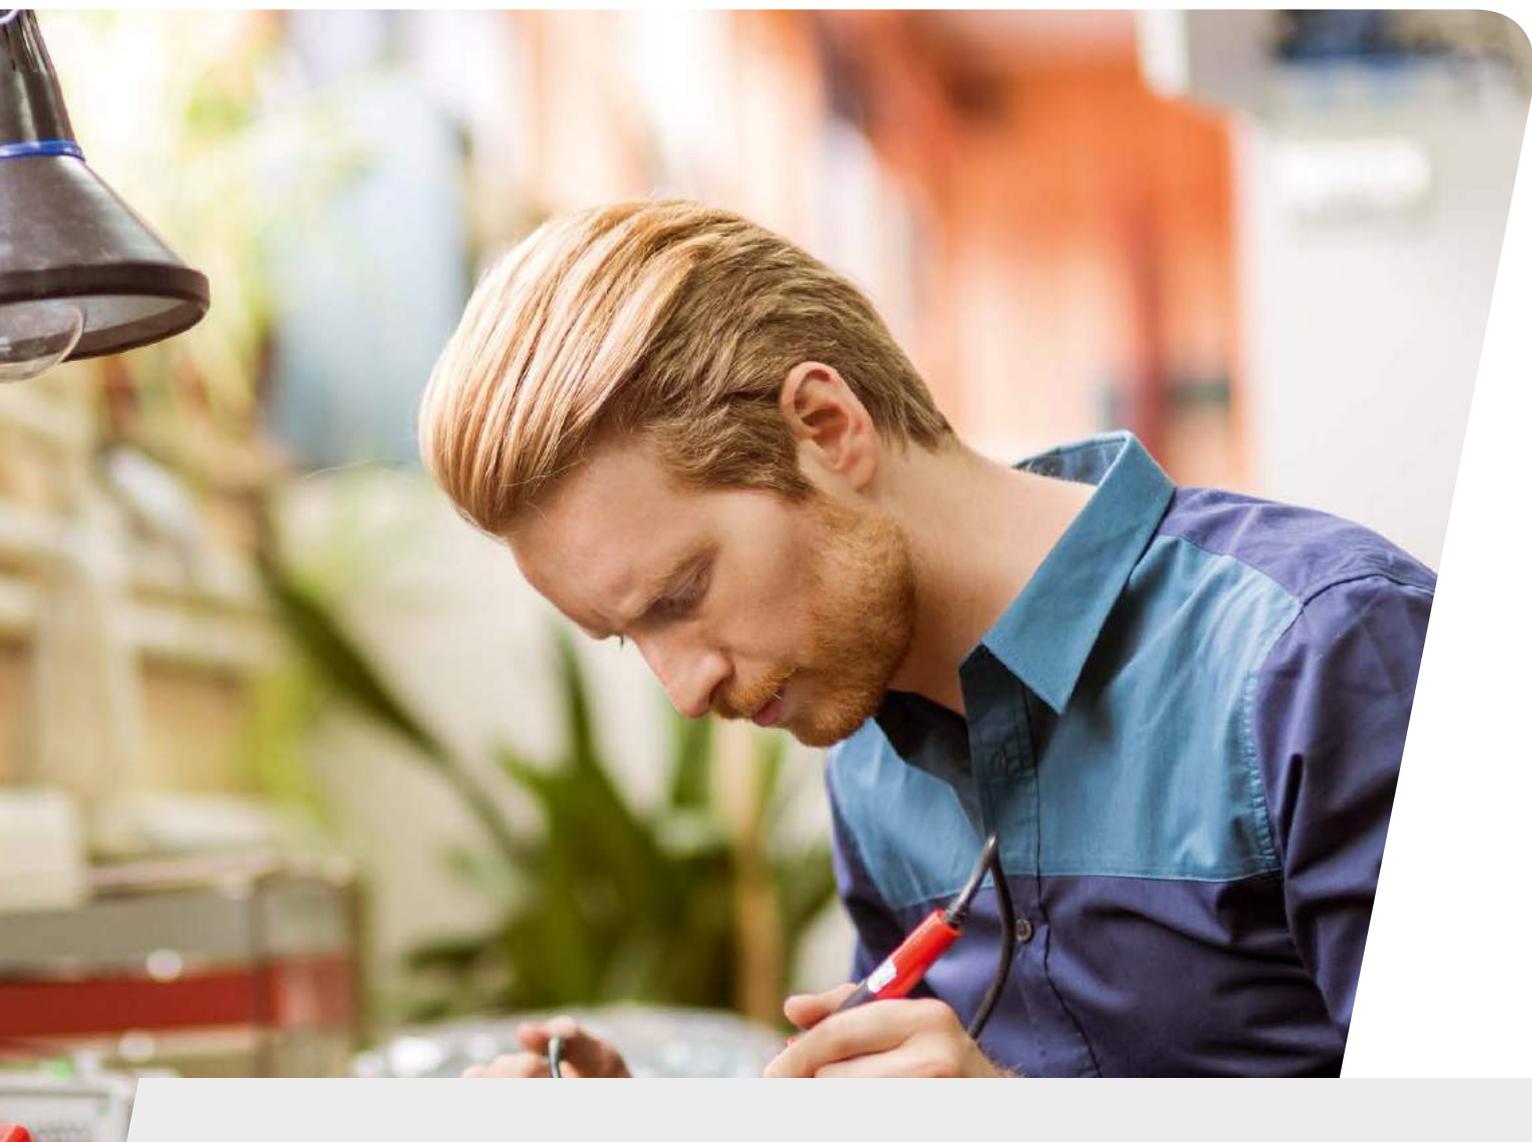

- International sales network
- High-performance logistics centre at the main plant in Kahl
- Personal points of contact near you
- The best conditions

# We invest in people.

## A strong team. For great results.

With our products, we are always one step ahead of the market. Because our engineers and technicians are curious and always keep their finger on the pulse with their research, discoveries and developments. In doing so, we rely on close cooperation between sales, marketing and production. And on motivated professionals. Because we are confident that trust and personal initiative generate the best ideas. As with Blue Electric. The damp room surface-mounted programme has exactly what the installer requires: a particularly large wiring space coupled with the ability to wire in any desired direction.

## That certain something **extra.**

A product is more than the interplay between function, material and design. For us, our team is the decisive certain something extra. We invest a lot of passion in the education and training of all employees. And this brings results: many of our employees have remained loyal to us for many years. In order for this to remain so, among other things, we have also developed active health management, which each employee can avail of according to his own requirements.

As a training company, we also offer junior staff excellent prospects. Many of our current managers started their careers with us. With our social commitment, we support young adults in the form of vocational guidance, helping them to discover their talents. With scholarships, internships and trainee programmes, we offer students the opportunity to experience our many task areas first hand.
