

Note!

Installation only by persons with relevant knowledge and experience in electrical engineering! *)
Improper installation could jeopardize:

- Your own life,
- the lives of the users of the electrical system.

Improper installation puts you at risk of serious damage to property, e.g. due to fire.

You may be personally liable for personal injury and damage to property.

Contact an electrician!

***) Expertise required for installation**

In particular, the following specialist knowledge is required for installation:

- The '5 safety rules' to be applied: Disconnect; secure against reconnection; ensure that there is no voltage; earth and short-circuit; cover or isolate neighboring live parts,
- Selection of suitable tools, measuring equipment and, if necessary, personal protective equipment,
- Analyzing the measurement results,
- Selection of the electrical installation material to ensure the switch-off conditions,
- IP protection types,
- Installation of the electrical installation material,
- Type of supply network (TN system, IT system, TT system) and the resulting connection conditions (classic earthing, protective earthing, additional measures required, etc.)
